

How to Make Fish Finger Puppets

1. Color each fish with crayons, markers, or colored pencils.
2. Cut out each fish carefully along the black outline.
3. Cut 5 strips of paper (about 1 inch wide and 4 inches long) for the finger loops.
4. Form a loop with each strip and tape or glue the ends together.
5. Glue or tape one loop to the back of each fish.
6. Slide a finger through the loop and swim your fish around!

Now you're ready to play "Five Little Fish" with your finger puppet friends!

Fingerplay: Five Little Fish Near the Shore

Five little fish were swimming near the shore,
One swam off, and then there were four!

Four little fish were splashing by a tree,
One got curious and swam out to sea.
Now there are three!

Three little fish played tag by the floor,
One got tired and took a snore.
Now there are two—just two more!

Two little fish swam near a sandy dune,
One swam off to find a tune.
Now there's one—gone too soon!

One little fish was lonely and blue,
He called his friends with a "glub glub" or two!
Back they came with a splash and roar—
Now there are five friends by the shore!
